CORE SKILLS

TECH STACK

- Python FastAPI Django
- SQL Java Redis
- Docker AWS Linux
- Git AsyncIO
- Microservices RBAC
- GenAI APIs

CERTIFICATIONS

- Python Essentials 1 & 2
Cisco / Python Institute · 2026
- Microsoft Achievements
Microsoft Education · 2026
- JPMorgan SWE Simulation
Forage · Sept 2025
- Walmart Adv. SWE Simulation
Forage · Jan 2026
- TCS SDLC Simulation

KALYANI GAJANAN NEMADE

Python Backend Developer · AI Engineer · Microservices Architect

✓ Open to Work — Remote & Hybrid

PROFESSIONAL SUMMARY

Results-driven **Python Backend Developer** with expertise in **Django, FastAPI and RESTful API design**. Proven ability to architect high-concurrency, event-driven systems achieving **35% throughput improvement** and **99.9% uptime** under peak load. Experienced in microservices architecture, **PostgreSQL optimisation, Docker containerisation**, and Generative AI integrations. AWS Certified. Currently pursuing **BCA (Software Engineering)** from Sant Gadge Baba Amravati University (2026).

PROFESSIONAL EXPERIENCE

Python Development Trainee

Jun - Jul 2025

iBase Electrosoft LLP · Amravati

- Engineered optimised Django/FastAPI backend configurations under senior architect mentorship.
- Debugged complex logical errors across multi-module Python systems in agile sprint cycles.
- Authored clean, maintainable Python code following OOP principles and REST design standards.

Android & IoT Developer Intern — 150 Hours

Jun 2025

iBase Electrosoft LLP · Amravati

- Integrated multi-tier architectures combining Android frontend with IoT hardware backends.
- Delivered end-to-end feature implementations across hardware and software layers.

Advanced Software Engineering Simulation

Jan 2026

Walmart Global Tech (Forage)

- Architected enterprise-scale Python backends, optimising relational schemas for high-throughput data operations.
- Applied advanced Data Structures to eliminate scaling bottlenecks in distributed backend systems.

Software Engineering Simulation

Sept 2025

JPMorgan Chase & Co. (Forage)

- Deployed real-time financial data feed backend components with live visualisation integration.
- Resolved critical Python framework conflicts in a simulated trading platform environment.

KEY PROJECTS

⚡ High-Concurrency Real-Time Data Engine

FastAPI AsyncIO PostgreSQL Redis Docker

Fully async, event-driven Python backend with non-blocking I/O, optimised DB connection pools (min=10, max=50), query batching and decoupled background worker queues.

35% Throughput ↑

Sub-10ms Latency

99.9% Uptime

🛒 Microservices E-Commerce Ecosystem

Django FastAPI PostgreSQL Nginx RBAC

Decomposed monolithic Django app into 5 independently deployable services (Products, Inventory, Orders, Payments, Auth) with RBAC at Nginx gateway and idempotency keys on Payments.

5 Microservices

Zero Data Collisions

EDUCATION

BCA — Bachelor of Computer Applications

RDG Women's College · Sant Gadge Baba Amravati University
